YOHANNES TEFERI

BACKEND-HEAVY FULL-STACK & AGENTIC AI ENGINEER

Addis Ababa, Ethiopia | yteferi964@gmail.com | github.com/yohannesteferi715 | @yoni715

PROFESSIONAL SUMMARY

Results-driven Engineer specializing in high-throughput backend microservices, resilient distributed architecture, and autonomous Agentic AI workflows. Proven track record designing production APIs with FastAPI and Django, relational database modeling with PostgreSQL, Redis asynchronous queues, and modern React user interfaces.

CORE TECHNICAL SKILLS

Backend & APIs: Python, FastAPI, Django, Django REST Framework, RESTful API Design, JWT/OAuth2 Auth
Databases & Queues: PostgreSQL, SQL Optimization, Redis Caching, Celery Background Workers, Kafka
Agentic AI & LLMs: LangChain, LangGraph, RAG Architectures, Vector DBs, Ollama, Prompt Engineering
DevOps & Systems: Docker, Kubernetes (k8s), Linux/Bash, Nginx, Git/GitHub, Microservices, CI/CD
Frontend & Tools: React.js, Tailwind CSS, JavaScript/ES6+, TypeScript, Next.js, Swagger/OpenAPI

PROFESSIONAL EXPERIENCE

Senior Backend & AI Systems Engineer | InnovateTech Labs (2024 - Present)

- Architected async REST microservices with FastAPI & PostgreSQL serving 100K+ daily transactions.
- Designed autonomous agentic AI assistants leveraging LangChain, vector retrieval, and custom tooling.
- Optimized database query latencies by 42% via PostgreSQL indexing and Redis caching tiers.
- Deployed containerized microservices using Docker and orchestrated self-healing deployments.

Full-Stack Software Engineer | Nexus Systems (2022 - 2024)

- Developed enterprise ERP web platform with Django REST Framework, PostgreSQL, and React.
- Built asynchronous notification pipelines using Celery and Redis with 99.9% delivery reliability.
- Implemented role-based access control (RBAC) and audited API security with zero regressions.

FEATURED PROJECTS

AI-Powered Agentic Assistant & Workflow Automation Platform

- Multi-agent autonomous workflow coordinator built with LangGraph, FastAPI, and local LLM runners.

Enterprise Multi-Tenant Inventory & Billing Engine

- Scalable ERP backend with Stripe integration, async report generation, and strict audit trails.

Real-Time Logistics & Telemetry Streaming Service

- High-concurrency event ingestion pipeline powered by Redis streams, WebSockets, and Celery.

EDUCATION

B.Sc. in Computer Science & Engineering (2018 - 2022)

- Focus: Distributed Systems, Data Structures & Algorithms (DSA), Software Architecture, Database Systems.
